“The insurmountable nature of trying to reproduce the water that could apparently have an effect on cancer and other diseases may seem to have been an impossible mission. Whether it was a testimony to genius, or purely a serendipitous occurrence, apparently, Dr.Smirnov proved equal to the task.”

~ Dr. Albert Szent Gyorgyi

The Science of Healing Waters

The structure of water can be changed not only by the geomagnetic fields that vary diversely over the planet but by the energy of thought as well. The bipolarity of water has been long established and the subsequent changes to bonding angles is not only plausible, but a regular occurrence. Ensuing physiological functions of this life-sustaining liquid that makes up more than seventy percent of the human body.

"The pulsation of life may go on forever"

*~Dr. Alexis Carrel
Winner of the Nobel Prize*

MRET[®] Technology

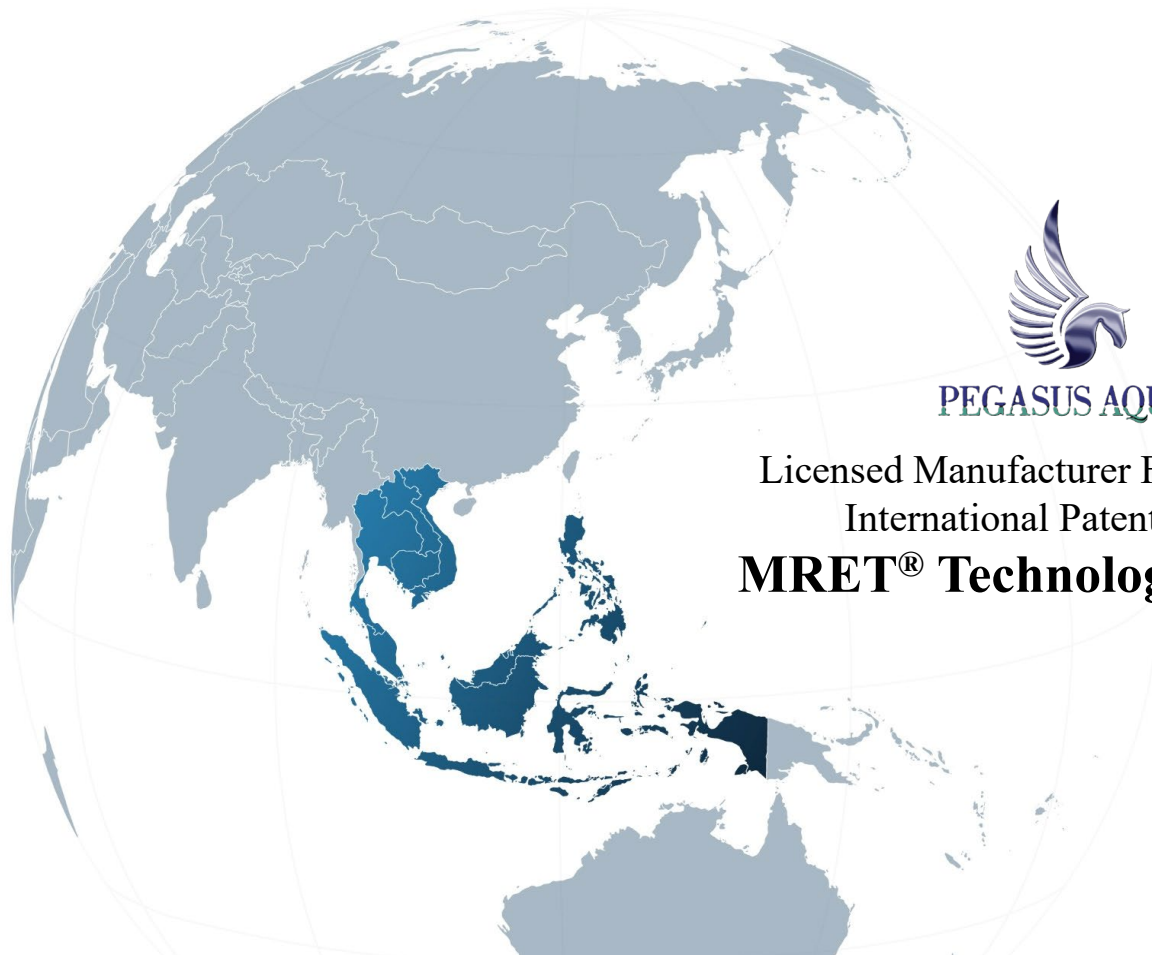

The cell is immortal. It is merely the fluid in which it floats which degenerates.
Renew this fluid at intervals; give the cell something on which to feed (nutrients)
The water that you drink MUST first be metabolically restructured into structure water.
before it is **BIO AVAILABLE** to your body.

Such restructured consumes high energy.
As we aged, our ability to do this decreases. And this develops our body age rapidly.
So, if we arrest this phenomenon, we can slow down aging process.
